## Universal series RF Receiver

FC ( $\epsilon$ Rots (iL) E

Important: Read All Instructions Prior to Installation

## Function introduction

## Product Data

| No. | Input Voltage | Output Current | Output Power | Remarks | Size(LxWxH) | equency : 868/915/434mhz |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1 | 12-36VDC | 4*5A | 4x(60-180) W | Constant voltage | $166 \times 53.4 \times 23 \mathrm{~mm}$ |  |

## Safety \& Warnings

- DO NOT install with power applied to device

DO NOT expose the device to moisture

## Operation

Do wiring according to connection diagram.

## air RF Receiver with RF remote:

1. Connect and wire up the RF receiver correctly, power on
2. Turn on the remote, click the "Learning Key" button on receiver, immediately click a zone number to pair the receiver to the specified zone if the remote is a multi-zone controller (if it is a single zone remote, this step is unnecessary), then touch the color wheel or slider bar on the remote (if the remote does not have color wheel or slider bar, click or touch any keys), the connected led light on receiver flickers twice, which means well paired. Note: one receiver can be paired with max 8 remote controls.

## Delete the pairing:

1. Wire up the RF receiver correctly, power on.
2. Hold down the "Learning Key" button on receiver for over 3 seconds until the connected led light on eceiver flickers twice, which means well deleted.

## Receiver/Repeater setting jumper:

One receiver can connect multiple repeaters to realize perfect sync the sync distance can be over 100 m no volt drop.

## Wiring Diagram

With single color lighting

With dual color lighting

## f you use multiple receivers, you have two choices:

Option 1: have all the receivers in the same zone, like zone 1

Option 2: have each receiver in a different zone, like zone 1, 2, 3 or 4
RF remote

Zone 1
Zone 2
Zone 3
